

Fixing Examyty issue following Blackboard update

A complication with the Blackboard update that occurred July 22nd and the Examyty tool temporarily made Examyty unavailable. The issue was reported and resolved July 24th.

However, the “Examyty” link in the left side Blackboard menu had to be deleted when the fix was applied.

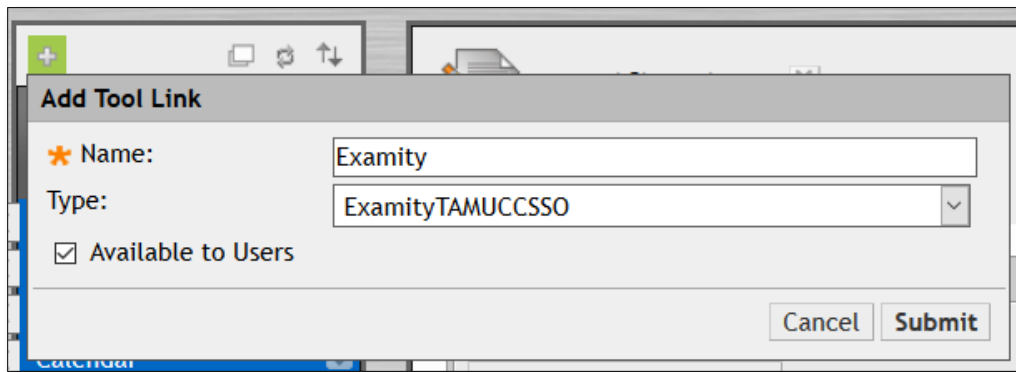

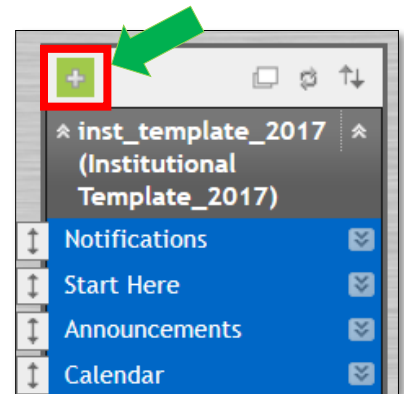

Instructors will need to relink to Examyty by following the tutorial below.

Step 1: Once you have logged into Blackboard, open a course that uses Examyty.

Step 2: Click on the green plus sign “+” at the top of the left side menu for the course.

Step 3: Select “**Tool Link**” from the drop down menu.

Step 4: Name the link “**Examyty**” and select “**ExamytyTAMUCCSSO**” from the “**Type**” dropdown menu.

Step 5: Check the box next to “**Available to Users**”, and then click “**submit**”.

Step 6: The new Examyty link will appear at the very bottom of the left side menu. Click and drag the up/down arrow symbol to the left of the link to drag it upwards.
